PROFILE

Dynamic frontend developer with 3 years of experience dedicated to crafting top-tier web applications, enhancing user satisfaction, and driving success in collaborative environments.

WORK EXPERIENCE

Tata Consultancy Services

System Engineer

TCS BaNCS   2023-Present

- Engineered and implemented a user-centric web application for seamless banking interactions using Rest APIs, integrating diverse features and captivating UI design; optimized frontend architecture for scalability, maintainability, and industry best practices.
- Architected scalable and maintainable frontend structures, aligning with industry standards.
- Implemented stringent code quality standards, authoring clean, efficient, and reusable code that led to a 40% reduction in bug reports and improved overall application performance by 25%
- Orchestrated code reviews and enforced coding standards, elevating team productivity and ensuring adherence to best practices, resulting in a decrease in post-release defects
- Implemented Backend For Frontend (BFF) methodology, fostering enhanced flexibility, scalability, and collaboration between frontend and backend systems, resulting in accelerated development cycles and superior end-user experience.

Assistant System Engineer

TCS BaNCS   2021-2023

- Orchestrated UI applications, increasing user satisfaction and decreasing support requests.
- Streamlined development processes with reusable components, reducing time-to-market and increasing productivity.
- Collaborated with senior developers to improve codebase maintainability and reduce technical debt.
- Executed testing initiatives, reducing post-release defects and improving application stability.
- Iterated based on feedback, increasing customer retention and improving product satisfaction.

PERSONAL PROJECT

Personal Portfolio using Angular JS

Technologies Used: Angular, TypeScript, HTML5, CSS3, Materal Angular
Description:- Developed a dynamic and responsive personal portfolio website using Angular and TypeScript to showcase professional skills, projects, and experiences. The website features a clean and modern design with an emphasis on user experience and accessibility.

Online food ordering website using Angular JS

Technologies Used: Angular Js, Node JS, Express JS, Mongo DB
Description:- This is a full stack resturant food ordering website using (MERN) Angular JS, MongoDB, Express and Node JS. The online food ordering front-end website is used to display food items, food cart, payment page and login registration page using Angular JS. I have structured the back-end of the website using express, node js, mongo db and react js. Where i have created the APIs to select food items, display food items,update cart items and login registration API.
